Terms of Admission.

EVERY candidate for admission into Bethany College must present to the President or Vice President satisfactory evidence of his good moral character.

He must procure and read a copy of the laws of the institution, and pay the required boarding, matriculation and tuition fees.

He will then receive permission to matriculate.

He shall then sign his name in a book to be kept for this purpose by the Secretary, in which shall be stated his age, the name and residence of his father or guardian, under a declaration in the following words, (which shall be distinctly read to him before he signs his name,) viz :

"Having carefully read the laws of Bethany College, I do hereby subscribe myself a student thereof. And I do hereby solemnly promise, that during my connection with it, I will faithfully observe and obey all its rules and regulations; and particularly that I will be diligent in study, punctual and orderly at recitations, strictly moral in language and conduct, respectful to the officers of the Institution, courteous to my fellow-students; that I will abstain from all kinds of gaming, from the use of all intoxicating liquors, and that I will neither keep nor use fire-arms, nor any other kind of deadly weapon whatever. And, moreover, I do hereby solemnly certify that at present I have nothing of the kind in my possession, or under my control."

Students will do well to bring no fire-arms or other weapons to the College, as they will be required in all cases to give them over into the keeping of the Faculty.

It is desirable that all students be present at the beginning of the term. And the settled policy of the institution requires that immediately on their arrival, they report themselves to the Faculty, and enter upon their prescribed course of study.

Terms of Continued Membership.—To remain in connection with Bethany College, it is required of every student:

1.—That immediately after his matriculation, he select from the different schools, with the advice and consent of the Faculty, an amount of study equivalent to three daily recitations. In some cases this may be too much, in others too little, for the capacity of the student. Due allowance will always be made in such cases. None will be unnecessarily retarded. But any departure from the established order of three daily recitations, must be made with the knowledge and approbation of the Faculty.

Catalogue of Bethany College.

2.—That he be diligent in study, and punctual in attendance upon recitations, examinations, and all other College exercises.

3.—That having entered any class, he shall not leave it without the permission of the Faculty.

4.—That he neither introduce upon the premises, nor use any intoxicating beverages.

5.—That he neither keep in his possession nor use fire-arms, a dirk, a bowie-knife, or any other kind of deadly weapon.

6.—That he abstain from profanity, the desecration of the Lord's Day, all kinds of gaming, even for amusement, and whatever is inconsistent with good order, good taste, and good morals.

7.—That he attend public worship every Lord's Day.

8.—That he do not leave the immediate precincts of the College premises during the Session, without permission from the acting President of the Faculty.

9.—That he carefully observe all the rules and regulations contained in the other Articles of this Code, respecting fees, Societies, College property, boarding, houses, *et cetera*.

☞ When a student matriculates, a circular shall be sent to his parent or guardian, stating the time of his arrival, the date of his matriculation, the classes he has entered, and the amount he has paid into the hands of the Bursar.

Courses of Study.

BETHANY College has two separate, complete courses, the Classical and Scientific, conferring respectively the degrees of Bachelor of Arts and Bachelor of Sciences. In addition, there are two special courses for Engineering and Chemistry, for which certificates alone are given.

PREPARATORY YEAR.

It is not in harmony with the policy of the Institution to receive boys from a distance, under fifteen years of age. But for the accommodation of young men who wish a higher grade of instruction than is furnished in the common schools, or to qualify themselves for admission into the Regular College Courses, the following *preparatory* studies of one year have been added :

FIRST TERM.—English Grammar, (Greene) ; Arithmetic, History of the United States, Latin Grammar, (optional).

SECOND TERM.—Algebra, Natural Philosophy, History of England, Day's Art of Discourse, Latin Grammar, (optional.)

Classical Course

FOR THE DEGREE OF BACHELOR OF ARTS.

This course embraces the following schools, viz :

1. School of Sacred History and Moral Philosophy.
2. School of Ancient Languages.
3. School of Mathematics and Astronomy.
4. School of Natural Science.
5. School of Mental Philosophy, Belles Lettres and Political Economy.

It is presumed that every student, previous to his entering upon the study of any of these schools, has made himself thoroughly acquainted with the following Preparatory Course: Ancient and Modern Geography, History of the United States, Elements of General History, English Grammar, Arithmetic, Elements, of Algebra, Latin Grammar, Latin Reader, Cæsar's Commentaries, Exercises in Latin Syntax and Prosody, Greek Grammar, Greek Reader, and Practical Exercises in Greek Syntax and Prosody.

1. School of Sacred History and Moral Philosophy.

Evidences of Christianity, Moral Philosophy, and Daily Lectures on the Bible.

Books of Reference—The Bible, Paley's Evidences of Natural and Revealed Religion, Butler's Analogy.

LECTURES on the Languages, History, and Character of the Old and New Testaments.

2. School of Ancient Languages.

PREPARATORY COURSE.

FIRST TERM.—*Greek*—Grammar, (Hadley,) Boise's First Lessons in Greek.

Latin—Grammar, (Harkness,) Arnold's First Latin Book, (Harkness.)

SECOND TERM.—*Greek*—Grammar, (Hadley,) Xenophon's Anabasis.

Latin—Cæsar, Latin Prose Composition.

COLLEGE COURSE.

FIRST YEAR.

FIRST TERM.—*Greek*—Xenophon's Anabasis, continued.

Latin—Cæsar's Commentaries, Latin Prose Composition, (Harkness.)

SECOND TERM.—*Greek*—Herodotus, and First Book of Homer.

Latin—Virgil, Latin Prose Composition.

SECOND YEAR.

FIRST TERM.—*Greek*—Homer's Iliad, Xenophon's Memorabilia of Socrates.

Latin—Cicero's Orations.

SECOND TERM.—*Greek*—Plato's Apology of Socrates or Crito, Theocritus, Kuchner's Greek Grammar.

Latin—Odes of Horace, Tacitus' Germania or Agricola, Zumpt's Latin Grammar.

THIRD YEAR.

FIRST TERM.—*Greek*—The Antigone of Sophocles, Selections from the Lyric Poets.

Latin—Satires and Epistles of Horace, and a Latin Drama.

SECOND TERM.—Comparative study of English ; Introduction to the Old and New Testaments—by Lectures.

Books of Reference used during the entire College Course: Brown's Greek and Roman Literatures, Doerderlein's Latin Synonyms, Classical Dictionary, Classical Geography and Atlas, Puetz and Arnold's Ancient History.

For the special benefit of those who desire to study the Greek Sacred Scriptures, a class is formed every session, in which select portions of the New Testament and the Septuagint are read and critically examined. Any one who has made respectable progress in the Greek Language is admitted. This class is voluntary.

3. School of Mathematics and Astronomy.

Every applicant for admission into this department will be examined in the principles of Arithmetic, and in Algebra to Equations of the Second Degree. Those not qualified to enter, can qualify themselves by joining the Mathematical Classes of the preparatory year.

FIRST YEAR.

Algebra—From Equations of Second Degree.

Geometry—Begun. (Chauvenet's.)

SECOND YEAR.

Geometry—Completed.

Trigonometry—Plane and Spherical, (Greenleaf.)

Analytical Geometry—(Coffin.)

Surveying—Begun, (Davies.)

THIRD YEAR.

Surveying—Completed.

Descriptive Geometry—(———)

The differential and Integral Calculus at the option of the student.

FOURTH YEAR.

Mechanics—(Stewart.)

Astronomy—(Snell's Olmstead.)

This department is well supplied with instruments, Astronomical Transit, Meridian Compass, Sextant, Theodolite, Surveying Compass, &c., all of which the student is required to use practically.

4. *School of Natural Sciences.*

Applicants for admission into this school will be examined in the principles of Physics, as taught in the preparatory year.

THIRD YEAR.

FIRST TERM.—*Physics*—(Stewart.)

SECOND TERM.—*Chemistry*—(Barker.)

FOURTH YEAR.

FIRST TERM.—*Geology*—(Lectures.)

Physiology—(Lectures and Recitations.)

Geology—(Begun.)

SECOND TERM.—*Geology*—(Finished.)

The Laboratory is supplied with everything necessary to the successful study of Chemistry in all its branches. The Professor will give personal attention to the Students, and those sufficiently advanced will be permitted and encouraged to make original investigations.

The application of the Microscope and Spectroscope to analysis will have particular attention.

A course in Toxicology and in Urinalysis is provided for any wishing them, but they are not required in the regular course. Students not wishing to take the Degree, can take the Practical Chemistry Course alone, and receive a certificate of proficiency.

5. *School of Moral Philosophy, Belles Lettres and Political Economy.*

SECOND YEAR.

SECOND TERM.—English Literature, (Shaw.)

FOURTH YEAR.

FIRST TERM.—*Metaphysics*—(Hamilton.)

Rhetoric—(Whately.)

SECOND TERM.—*Logic*—(Whately.)

Political Economy—(Wayland.)

Scientific Course.

FOR THE DEGREE OF BACHELOR OF SCIENCES.

This course embraces the following Schools :

1. The School of Sacred History and Moral Philosophy.
 2. The School of Mathematics and Astronomy.
 3. The School of Natural Science.
 4. The School of Modern Languages.
 5. The School of Mental Philosophy, Belles Lettres, and of Political Economy.
-

1. *School of Sacred History and Moral Philosophy.*

Evidences of Christianity.

Moral Philosophy,

Daily Lessons on the Bible.

Introduction to the Old and New Testaments ; by Lectures.

Books of Reference—The Bible, Paley's Evidences of Natural and Revealed Religion, Butler's Analogy.

The Lectures are designed to exemplify and apply the true principles of interpretation, and to teach and enforce the great facts and principles of the Scriptures.

2. *School of Mathematics and Astronomy.*

(Applicants for admission will be examined in the principles of Arithmetic, and of Algebra to Equations of Second Degree.)

FIRST YEAR.

FIRST TERM.—*Algebra*—From Equations of Second Degree.

SECOND TERM.—*Geometry*—(Chauvenet's.)

SECOND YEAR.

FIRST TERM.—*Geometry*—Solid and Spherical.

Trigonometry—Plane and Spherical.—(Greenleaf.)

SECOND TERM.—*Conic Sections and Analytical Geometry*.—(Coffin.)

Surveying—Plane, laying out lands, &c.—(Gillaspie.)

THIRD YEAR.

FIRST TERM.—*Surveying*—Leveling, Topographical Surveying.

Descriptive Geometry—(———.)

Catalogue of Bethany College.

SECOND TERM.—*Geometrical Drawing*—Shades, Shadows and Perspective. Constructions in Wood, Stone and Iron.—(Warren.)

Coloring and Lettering.

Railroad Surveying.

Mining Surveying.

Road Surveying—(Gillaspie.)

Differential and Integral Calculus—(Woodhouse & Cox.)

In this year there are two daily recitations, and extra work in the field or at the drawing table. In the field, the work on railroad surveying, from the use of the chain and rod to the level and transit, is exemplified and made practical.

FOURTH YEAR.

Mechanics—(Stewart)

Astronomy—Snell's Olmstead, with practical use of instruments, the Sextant, Astronomical Transit, Altitude and Azimuth Instruments, &c. and computations of time, latitude, longitude, &c., &c.

3. *School of Natural Science.*

Applicants for admission into this school, will be examined in the elementary principles of Physics, as taught in the preparatory year.

THIRD YEAR.

FIRST TERM.—*Physics*—(Stewart)—The laws of heat, light, electricity, pneumatics and acoustics, are studied, and are demonstrated and illustrated in the class room by experiments.

SECOND TERM.—*Chemistry*—(Barker's)—Theoretical Chemistry receives most attention in the class room, while its general principles and the properties of the elements are fully illustrated by experiments.

The student also commences a course of practical Chemistry in the Laboratory, and learns to analyze solids and solutions by the blowpipe and re-agents, and thus familiarizes himself with the Chemical properties of bodies by actual work with them.

FOURTH YEAR.

FIRST TERM.—*Chemistry*—(Continued)

Quantitative Analysis, Verification of the laws of Chemical Union, with determinations of minerals and assaying.

Zoology—(Lectures.)

Physiology—(Lectures and Recitations.)

Geology—(Recitations and Lectures.)

Botany.

4. *School of Modern Languages.*

FIRST YEAR.

French—Keetel's Grammar, Fvias Reader, Spiers and Surenné's Pronouncing Dictionary.

SECOND YEAR.

German—Woodbury's Grammar, Woodbury's Reader, Schiller's Wilhelm Tell.

5. *School of Mental Philosophy, Belles Lettres, Political Economy.*

SECOND YEAR.

SECOND TERM.—English Literature, (Shaw.)

FOURTH YEAR.

FIRST TERM.—*Metaphysics*—(Hamilton.)

Rhetoric—(Whately.)

SECOND TERM.—*Logic*—(Whately.)

Political Economy—(Wayland.)

Special Course in Engineering

FOR WHICH A CERTIFICATE IS GIVEN.

For this Course, no fixed time is allowed. Its object being special, the student need remain only during the time necessary to finish the studies it embraces. If prepared in Trigonometry and the studies preceding it, he can complete this course in a year or eighteen months. It is practical throughout, the student being half of each day in the field or at the drawing table.

1. Land Surveying, including the various methods with the chain, compass and theodolite.
2. Laying out of Lands.
3. Topographical Surveying and Drawing.
4. Lettering and Coloring.
5. Leveling, Profiling, Mapping.
6. Descriptive Geometry.
7. Geometrical Drawing, Constructions in Wood, Iron, Stone, &c., Shades, Shadows, and Perspective.
8. Roads and Railroads, with field operations, tangent lines, running levels, establishing grades, laying out curves, cross sections, &c., &c.
9. Mining Surveying.

Special arrangements can be made by those wishing to pursue exclusively a single branch, as Land Surveying, or field practice in Railroad Surveying. For such, a separate charge is made, proportioned to the time employed. Certificates will be given indicating the branches studied, and the degree of proficiency attained.

Special Course in Practical Chemistry

FOR WHICH A CERTIFICATE IS GIVEN.

1. *Qualitative Analysis*—The examination of a hundred solids, and solutions to determine their composition.

2. *Mineralogy*—The determination of a hundred minerals with the blow pipe.

3. *Quantitative Analysis*—The determination of the amount of the elements, basis and acids in various compounds.

4. *Assaying*—The determination of the amount of pure metal in the various ores of gold, silver, copper, lead, iron, &c.

5. *Pharmacy*—The preparation of various medicinal agents and drugs—Acidimetry and Alkalimetry.

The course in Qualitative Analysis is essential for the successful prosecution of any of the others, and will be required. After that, a student may take any one or all of the others. The certificate will indicate the branches studied, and the degree of proficiency attained.

Any one qualified will be permitted and encouraged to make original investigations, and will be furnished with the apparatus and chemicals necessary.

The cost of Qualitative Analysis will be about twenty-five dollars; for mineralogy, ten dollars. For the others, a charge will be made proportional to the amount of materials used.

BOOKS OF REFERENCE.

Dolbear's Tables.

Elliot & Storer's Qualitative Analysis.

Fresenius' Qualitative and Quantitative Analysis.

Barker's Chemistry.

Elderhorst's Blowpipe Analysis.

Mitchell's Assaying.

Parish's Pharmacy.

MODERN LANGUAGES AND THE HEBREW LANGUAGE.

1. The French and German Languages and Literatures.

2. The Hebrew Language.

ELOCUTION.

To be able to speak well is one of the most important arts that a public man can acquire. It is, however, one that is greatly neglected, especially in the quality of Elocution. We have felt the high value of this kind of culture, and made arrangements to have the services of one of the most eminent teachers of Elocution in the country. Prof. Robert Kidd stands admittedly among the very first teachers of this art in America, and we are gratified to state that he will take charge of this department of Bethany College, and thus afford the students every facility for making themselves masters in the art of Public Speaking.

A PECULIAR FEATURE IN BETHANY COLLEGE.

To this feature we would call special attention.

The rule prevailing generally in Colleges, that students must take the whole Freshman, Sophomore, Junior, or Senior year, together, does not obtain in Bethany College. A student is allowed to enter in the several schools, at the same time, such classes as his attainments entitle him to. For example, if he is further advanced in Latin than in Greek, he is not kept back in the former for the sake of the latter, but may go on in each language in the classes for which he is fitted. So also, if his attainments in the Mathematics are higher than in Language, he is not obliged to wait in the former till he has brought the latter abreast of it, or enter a lower class in Mathematics or the Natural Sciences than he is entitled to, because of defect in other Departments. Thus a student may finish in one or more schools, and receive a certificate of these, (see *Terms of Graduation*,) while he is still in lower classes in other Departments. This arrangement meets the wants of many young men desiring to enter college. It allows a student to finish one school, and then gives him more time for other unfinished studies; or he may desire only to finish in some of the schools, but at the same time also to prosecute, to a certain extent, his studies in others.

BIBLICAL INSTITUTE.

COURSE OF LECTURES.

These Lectures will consist of a *first* and *second* series of *two months* each, in successive sessions. Each series will be so arranged that the student may take them in any order that may suit his convenience; but it will require him to attend two successive sessions to get the benefit of

both series, and to entitle him to a *certificate*. They will be popular in style, so as to require no *classical preparation* in the student, and will embrace the following subjects :

- I. The Book of God, its Origin, its History and its Interpretation.
- II. History of the Jews and their Land, Past, Present and Future—with the Principles of Prophetic Interpretation.
- III. The Christ—His Divinity, Humanity, Life, Sacrifice, Resurrection, Doctrine, Government, and Second Coming.
- IV. The Church—Its Origin, Growth, Conflicts, Corruptions, Reformations, Missionary Spirit, and Ultimate Destiny.
- V. The Preacher—His Work and Duty in reference to all these—*what* he must do and *how* he must do it.

Bethany College presents this as a *free will offering* to all who choose to enjoy its benefits, whether regular students of the college or not.

The instruction under this head will be distributed among the Lecturers, and connected with practical training in the composition and delivery of sermons.

TERMS OF GRADUATION.

DIFFERENT SCHOOLS.

A student may graduate in any School singly. To obtain the Degree of *Graduate* in any School, it is required of every candidate :

1. That he shall have been a student of Bethany College, at least one session.
2. That within one month from the beginning of the session, he shall have made known to the Professor in charge his intention of graduating.
3. That he stand a satisfactory examination on all the prescribed studies of the Department. On paying a fee of *three dollars* he shall be entitled to a *Certificate of Graduation*, signed by the President and Professor of the School.

DEGREE OF BACHELOR OF ARTS AND OF BACHELOR OF SCIENCES.

- To receive the Degree of *Bachelor of Arts* or that of *Bachelor of Sciences*, the candidate must have graduated and received his certificate in the several Schools embraced in the respective *courses*. He must also have faithfully observed all the other laws and regulations of the College. He will then receive the Degree and Diploma *free of charge*.

DEGREE OF MASTER OF ARTS IN COURSE.

In order to attain the *Regular Literary Degree of Master of Arts*, the following conditions are required :

1. The attainment of the degree of A. B.
2. An actual collegiate attendance thereafter, for one session at least, and the study of three Modern Languages, to be selected by the candidate, with the right,

however, to substitute the Hebrew, or its equivalent, for one of them.
3. An approved examination on the selected course of study. A fee of *ten dollars* will be charged for the Diploma.

HONORARY DEGREE OF MASTER OF ARTS.

Any Bachelor of Arts of five years or longer standing, may receive the Degree of Master of Arts, on the payment of ten dollars to the Library Fund; provided, he shall, in the interval, have maintained an exemplary and virtuous character, and become distinguished in Literature or some one of the learned professions. Candidates for this degree should apply to the President or Secretary of the Faculty before the Annual Commencement.

No application for the degree of A. M. will be entertained unless accompanied by the *fee* of \$10, which will be returned, in case the degree is not conferred.

ACCOMMODATIONS.

Students are permitted to select their own places of boarding, subject in all cases to the supervision of the Faculty. The facilities for obtaining boarding in private families have been much increased, and many students can be accommodated in this way. The College boarding house, directly connected with the College, will be kept by a competent Steward. Every attention will be paid to the health and comfort of the Students.

To accommodate Students who desire to board themselves, arrangements have been made to supply a number of unfurnished rooms at a very moderate rent. Applications for these should be made at an early date, and must be accompanied by satisfactory testimonials of character.

APPARATUS.

The Philosophical and Chemical apparatus of the College is of the most elegant and approved kind. Provision is made for adding to it the new improvements as they may be made, so as to furnish the amplest facilities for thorough illustration in every branch of the department.

Our Mathematical Instruments are of a very superior character, and it is believed that but few Institutions in the West are as well supplied with the means of scientific illustration as is Bethany College.

LIBRARY.

We have already laid the foundation of a new Library. We hope soon to build up a better Library than the one we have lost, and trust

that all who feel an interest in our success, will aid us by their contributions.

CABINETS AND MUSEUM.

1st. *The Natural History Cabinet* contains most of the Fauna of the region, Birds and Mammals, with a very valuable collection of both, from South America, Australia, and exchanges with other sections of the country. Also a fine Herbarium of native plants, with many rare ones from other parts of the world.

2d. *The Mineralogical and Geological Cabinet* contains several thousand specimens of Minerals and Fossils from all parts of the world, to which new contributions are constantly made. It has recently been enriched by several hundred specimens of Minerals and Fossils from Australia and Colorado.

3d. *The Ethnological Cabinet*, though not large, contains rare and valuable collections.

DISCIPLINE.

The Discipline of the College is in harmony with the benevolent object of its founder, in establishing an institution for the promotion of pure Literature, and a liberal Christian education. Hence, no student can be permitted to remain who indulges in card playing, intemperance, profanity, neglect of study, or any other vice or impropriety. We aim, however, to govern through the approval of the judgment and the heart, rather than by force of law and authority. Hence, the discipline is parental; and daily moral instruction, based upon the Bible, leaves but little else to be done in government. We aim to make the Student a law unto himself.

REPORTS.

Monthly "Reports" will be addressed by the Secretary of the Faculty to the parent or guardian of each student, in which are stated his attention in class, supposed industry, proficiency in each of his studies, absences from lectures and recitations, and his general deportment, with such other information as it may be necessary to communicate.

TERMS, VACATIONS AND EXAMINATIONS.

The College Year consists of two terms, four and a half months each. It begins on the last Monday in September, and ends on the third Thursday in June. In this year there are two examinations in each class—one in February, and the final examination in June. The graduate is required to prepare an Address for Commencement Day, which must be submitted to the Faculty by the first Monday in June.

It is very desirable that applicants for Matriculation present themselves at the beginning of the session, that there may be a convenient arrangement of the classes in the various Departments of Schools. Students, however, can enter conveniently at the commencement of the second term, directly after the intermediate examination in February.

OUR BUILDINGS.

The entire pile of buildings is now completed and presents a front of 420 feet. Of the central building, 192 feet are two stories high, and in the rear of the central or main entrance there is a tower 22 feet square, and 130 feet high, surmounted by a spire 36 feet high, making the greatest elevation 156 feet. At the extreme right is a wing occupying about 60 feet of the front, and extending back 80 feet, and two stories high. This portion of the building is a fine specimen of architecture, and is constructed of enduring materials of brick and stone, and slated roof. Its halls and rooms are capacious and convenient, with lofty ceilings, well lighted and well ventilated. It was specially planned for the accommodation of the Societies of the College, and will be exclusively appropriated to their use.

At the extreme left is the Grand Hall, measuring 43 feet front, and extending back 112 feet.

In the rear of the first story of the main building there is an open corridor 14 feet wide, extending 308 feet from the Grand Hall to the right wing. It is 14 feet high, in the clear, and is supported by buttresses.

There are five front entrances ; the central one opens into a hall 19 feet wide, which extends across the long corridor to the main staircase. On each side of this hall is a room 18 by 26 feet, one is an Apparatus room, and the other is the Trustees' room, which is provided with a large fire-proof vault. On each side of the main stairway is a students' waiting or study-room. The first floor includes, additionally, two Lecture rooms, each 27 by 38 feet, two Class rooms each 27 by 30 feet, Professors' rooms, Tutors' rooms, Apparatus rooms, etc.

The second story is divided into two Class rooms, each 27 by 30 feet, a Library room, 41 by 58 feet, a Museum, 25 by 41 feet, a Picture Gallery, 25 by 41 feet, and four Professors' and Tutors' rooms.

In the basement is a large Laboratory, the Janitor's residence, Gymnasium, Fuel rooms, etc,

All the walls are of brick, and the roofs slated in the best style. The doors and window sills, lintels and hoods, steps, cornices, wall and tower coping, roof, crotchets, finials, etc., are of stone. The interior wood is of white and yellow pine. The entire building is constructed of the

best materials, and in the best manner, and in style in every respect worthy of the great purposes to which it is devoted.

LITERARY SOCIETIES.

There are in connection with the College, two Literary Societies. The Halls provided by the College for their accommodations, are capacious, convenient, and well ventilated, and are constructed according to the most approved modern style, with open timber roofs, etc. They have been elegantly furnished in corresponding taste and style. The Societies have well selected libraries of their own.

Every facility is afforded by the authorities of the Institution for increasing the accommodations and adding to the usefulness of these valuable auxiliaries to the Institution.

ADELPHIAN SOCIETY.

As this Society differs in some important respects from a purely Literary Society, it demands a more particular notice.

As it is a distinguishing feature of Bethany College to make the Bible a regular subject of study and daily examination, the Adelprian Society has been organized in order to promote and carry out, to the fullest extent the purposes contemplated in the department of Bible Literature.

The regular exercises of the Society consist—

- 1st. Of recitations of portions of the Scripture.
- 2d. Reading original essays on moral and religious subjects; and,
- 3d. The delivery of Scriptural discourses; not only before the Society, but on suitable occasions, in public.

Young men preparing for the Christian Ministry, may derive incalculable advantages from this Society, which is so well fitted from its organization, and the character and ability of its members, to facilitate the acquisition of enlarged views of the Bible, and the cultivation of a high standard of morality and religion.

The Society has a well furnished and commodious Hall for its meetings. It has a well selected Library to which it respectfully solicits contributions of works auxiliary to the study and comprehension of the Bible, Ecclesiastical History, Ethics, etc. Any such donations from individuals friendly to the Institution, will be gratefully received.

EXPENSES.

The College year is divided into two terms, of four and a half months each. The usual expenses, exclusive of books, clothes, &c., are as follows:

Catalogue of Bethany College.

Boarding, per week, including furnished rooms and fuel, from	\$4 00 to \$5 00
Washing per month,	1 00 to 1 50
Light extra.	
Tuition, College course, <i>per term</i> ,	\$15 00
“ Preparatory year, <i>per term</i> ,	10 00
“ Special course in Engineering, <i>per term</i> ,	12 50
“ Modern Languages, to those not in scientific course, <i>per term</i> ,	5 00
Matriculation and contingent expense fee, <i>per session</i> ,	5 00

All Students in the Scientific Course, including those receiving gratuitous instruction, will be charged *extra* for the chemicals they use in the Laboratory, and a fee of \$3 00 for the use of field instruments.

One half of the expenses of the College year must be paid *invariably in advance*.

Students entering after the commencement of the *term*, or leaving before its close, will be allowed no reduction on their tuition; provided, however, that those who thus leave with the permission of the Faculty may return during the subsequent term for a period equal to the time of their absence, *free of additional charge* for tuition.

All remittances are to be made to W. K. PENDLETON, Bethany, Brooke county, W. Va, with whom also may be deposited, for safe keeping, the private funds of each student, free of all per centage.

The Faculty earnestly advise parents to expressly forbid merchants and others from crediting their sons while at College. Apart from the habit of extravagance which this license almost unavoidably cultivates, there are other evils which are extremely detrimental to student-life. A request to any member of the Faculty to this effect will be promptly attended to.

GRATUITOUS INSTRUCTION.

1. Indigent and pious young men who wish to prepare for the Ministry in any of the religious denominations, on paying the matriculation fee, and submitting to the Faculty written testimonials from their congregations recommending them as worthy, will be admitted into Bethany College, free of all tuition fees, during the entire College course.

2. The sons of regular Ministers of the Gospel of all denominations, are admitted to all the classes and privileges of the College free of all charges for tuition.

All students admitted to gratuitous instruction, if needed and qualified, may be required to give instruction in the Preparatory Classes. Otherwise, it is expected, though not required, that when able, they will refund to the Institution the amount of their tuition fees, for the benefit of other students in similar circumstances.

Bethany College.

THIS Institution is situated in Brooke county, West Virginia, seven miles from the Ohio river, and sixteen miles north of Wheeling.

It has a very liberal charter, by which all necessary powers are conferred, and the rights of its Alumni fully secured. From the peculiar organization of this Institution, it presents important advantages to those who wish to secure, in addition to literary and scientific acquirements, a highly moral and practical education. Some of these advantages we will now briefly enumerate.

The most particular attention is paid to the moral instruction and training of the youth in this Institution. A full course of lectures is delivered every session upon Sacred Literature, in which the great matters of Piety and Humanity are elucidated and enforced by appropriate examples. These lectures, which are general, familiar and discursive, are entirely free from all sectarian character, and do not touch upon any of the peculiarities of particular religious parties. They are adapted to the circumstances of the class, and admirably fitted to supply defects in the early education of youth, and so give a bias in favor of morality and virtue. And should any case of immortality or insubordination arise, a firm and vigorous discipline by the Faculty, will promptly deliver the Institution from the contaminating influence of corrupt examples. The peculiar location of the College, too, affords the greatest facilities for moral culture. Being remote from any large town or city, and surrounded by a moral and industrious population, engaged in agriculture, it is secluded from those haunts of dissipation, and those vicious associations so fatal to youth in cities.

The location of Bethany College is not only favorable to moral culture, but also evidently advantageous in regard to physical health. It may be said with emphasis, that there is not in the United States a more healthy location. It is in the midst of a hilly and elevated region, where there is pure air, fine water, and *perfect exemption* from those intermittent, congestive and malignant fevers, so prevalent in certain portions of the Western country.

The railroad station for Bethany is Lagrange, on the Cleveland, Pittsburgh and Wheeling Railroad. From this station, which is seven miles distant, a daily mail coach runs, on a Macadamized road, to Bethany.

CALENDAR.

Annual Meeting of the Board of Trustees,

On Wednesday before the third Thursday in June.

Annual Commencement, . . . on the third Thursday in June.

Session begins, last Monday in September.

Christmas recess begins, December 22.
